

## Mouse anti-Meningococcal polysaccharide(C)antibody, mAb 2H4

**Cat#: 05-0101**

GENERAL INFORMATION	
Physical State	Liquid
Immunogen	Meningococcal polysaccharide C
Preparation	This antibody is produced by a hybridoma cell, which is produced by the fusion of a mouse myeloma and a B cell, the B cell is obtained by immunizing mice with Meningococcal polysaccharide C. The IgG fraction of the cell culture supernatant was purified by protein G affinity chromatography.
Specificity	Base on ELISA, this antibody reacts with Meningococcal polysaccharide(C) Specifically.
Formulation	Please see Certificate of Analysis for specific instructions. For best performance, we strongly recommend you to follow the reconstitution protocol provided in the CoA.
Storage	This antibody can be stored at 2℃-8℃ for short term (1-2 Week) without detectable loss of activity. Antibody products are stable for 2 years from date of receipt when stored at -20℃ to -80℃. Avoid repeated freeze-thaw cycles.
APPLICATIONS	
Applications	ELISA
RECOMMENDED CONCENTRATION	
ELISA	This antibody is suitable for use in ELISA: $\geq 0.005\mu\text{g/mL}$ .
Please Note: Optimal concentrations/dilutions should be determined by the end user.
